In developing countries, traditional fishermen are important food contributors, yet technological information and development assistance to third-world nations often focuses on agriculture and industrial fishing, without addressing the needs of independent, small-scale fishermen. This book explores technological considerations of small-scale, primitive fishing technologies, and describes innovative, relatively inexpensive methods and tools that have already been successfully applied in developing countries. It offers practical information about all aspects of small-scale fishing, including boat design and construction, fishing methods and gear, artificial reef construction and fish aggregating devices, techniques for coastal mariculture, and simple methods for processing and preserving fish once they are caught. Fisheries Technologies for Developing Countries is illustrated throughout with photographs of the devices and construction methods described in the text.

More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink.

Orphaned and homeless in New York City at 14 years old in 2009, Carlo Juliano lived on the streets to survive until a local crime family boss, Johnny Toracio, gave him a job, his own place to live, and mentored him into a life as a gangster. For the next few years, Carlo flourished on the streets of New York befriending leaders of construction scams, art theft rings, drug cartels, biker gangs, extortion rackets, gambling, and cybercrime. In 2015, a series of events ignited a treacherous power struggle for control of New York City's underworld.
