Offers a thorough exploration of the denizens and libations that inhabit wine country in the Finger Lakes region of New York state. Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The I-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

Have you ever wondered why most books of quotations are stuffed full of rather pedestrian quotes by people you've never heard of? It's a shame because a really good quotation book, one which gathered the truest and funniest insights of the best minds, and organised them into 250 subjects, from ambition to worry, (or from artichokes to woodpeckers), a book which offered you a useful take on almost every situation life throws at you (from the death of your child's hamster to the unified theory of everything), a sourcebook of wise one-liners, of knock-out jokes, of drole asides and heartfelt statements of truth and beauty, a practical handbook of interestingness, well, that would be worth having. And, guess what? Those thoughtful gentlemen at QI have come up

with one. Five years of learning how to avoid the dull stuff have left the QI team in a uniquely good position to deliver this elusive holy grail: the big, useful, funny and really very good book of quotations.

The book continues with an experimental analysis conducted to obtain accurate and complete information about electric vehicles in different traffic situations and road conditions. For the experimental analysis in this study, three different electric vehicles from the Edinburgh College leasing program were equipped and tracked to obtain over 50 GPS and energy consumption data for short distance journeys in the Edinburgh area and long-range tests between Edinburgh and Bristol. In the following section, an adaptive and robust square root cubature Kalman filter based on variational Bayesian approximation and Huber's M-estimation is proposed to accurately estimate state of charge (SOC), which is vital for safe operation and efficient management of lithium-ion batteries. A coupled-inductor DC-DC converter with a high voltage gain is proposed in the following section to match the voltage of a fuel cell stack to a DC link bus. Finally, the book presents a review of the different approaches that have been proposed by various authors to mitigate the impact of electric buses and electric taxis on the future smart grid.

This new edition of Dr. Barbir's groundbreaking book still lays the groundwork for engineers, technicians and students better than any other resource, covering fundamentals of design, electrochemistry, heat and mass transport, as well as providing the context of system design and applications. Yet it now also provides invaluable information on the latest advances in modeling, diagnostics, materials, and components, along with an updated chapter on the evolving applications areas wherein PEM cells are being deployed."--pub. desc.

The BMW 3 Series set the benchmark for performance and luxury. Yet even at this high standard, these cars can be dramatically improved. Each major component group of the car can be modified or upgraded for more performance, so you can build a better car that's balanced and refined.

Chronicles the visual history of Road & Track magazine, including photographs, paintings, technical drawings, and cartoons. To control the migration of radioactive and hazardous wastes currently contained underground, barriers made of natural materials and man-made substances are constructed atop, and possibly around, the contaminated area. Barrier Technologies for Environmental Management provides a brief summary of the key issues that arose during the Workshop on Barriers for Long-Term Isolation. Recurring themes from the session include the importance of quality control during installation, followed by periodic inspection, maintenance, and monitoring, and documentation of installation and performance data. The book includes papers by the workshop presenters.

In spite of all the assistance offered by electronic control systems, the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references, this new edition already includes a number of improvements over the first edition. CD-ROM contains full text for all the procedures available in the manual. Files are provided both as fully formatted Word 6.0 (.doc) documents and as text-only documents (.txt).

No husband, no boyfriend, no pets and definitely no children... These were the "rules" that took magazine CEO Leila Owens to the top. Always in charge, in control, she was never rattled. Until she finds a baby in her kitchen on Christmas—and a sexy neighbor wearing next to nothing knocking at her front door... Garrick Grayson didn't know whom to comfort first, the howling infant or the career diva without a clue. But with a little help, Leila's soon juggling bottles, naps and meetings, while Garrick is falling for adorable Emma—and gorgeous, feisty, maternally challenged Leila. Garrick had sworn off women married to their jobs; Leila had sworn off everything else. So why, when they were together, did things feel so...right?

Amy was a widow with three very young children. For a long time she had been looking for a house cheap enough for her

to buy, as she wanted a good home for her children. At last a woman made her an offer of a house that was just about perfect for Amy's needs, at a price that she could afford, but it had to be purchased in a hurry. The day that Amy and her children moved in she had to face problems that she had never imagined. The more that she worried desperately trying to put thing right the deeper she fell into a bottomless pit.
