Unbeatable BMW is the comprehensive history of BMW competition from 1917 through 1997. and motorcycling deeds. Included are gripping accounts of the preparation and track-side action for such emotive winners as the diminutive BMW 700 coupes to the 1800 "Tisa" and 2002s. Walton sweeps through the 1970s "Batmobile" 3.0 CSL lightweight racing coupes, then explores the best-selling 3-series in every race category. Walton also covers the unexpected success of the 5- and 6-series, the latter against Jaguar. Unbeatable BMW recalls the establishment of BMW's Motorsport division, and the thrill of the first M-Powered cars. From M1 onward, the author details the burgeoning M-brand, how MPower won the first world title for a turbocharged car (1983), and the years as the backbone of European Formula 2. The book's 582 pages are packed with detail to thrill the heart of the most ardent BMW fan, from meticulous photo captions listing car, driver, and race date, to six appendices covering the competition cars since 1960, drivers' accomplishments, and powerplant specifications. In short, if BMW has raced, rallied, or flown their products in competition, Unbeatable BMW gives the full, behind-the-scenes story in this compelling account of the marque's motorsports history.

When the Berlin Wall came down in November 1989, it exposed a crumbling empire littered with hundreds of tonnes of nuclear material and thousands of nuclear weapons. Across Russia and the former Soviet Union, stocks of plutonium and bomb-grade uranium, as well as a wide variety of nuclear landmines, artillery shells and missile warheads were portable enough to be carried by just three people. The short-range missile warheads, small nuclear bombs, landmines and torpedo warheads could be lifted and carried by a single person and were small enough to fit into a backpack or trunk. In this account, journalists Andrew and Leslie Cockburn show that prospect criminals, extremists or terrorists might easily obtain these weapons, and that the threat from nuclear materials is dangerously real.
