wracking to prepare for. That's why we created the Mississippi Real Estate License Exam Prep (MS-RELEP) the way we did. Since we have been managing real estate schools and developing curriculum for forty years, we know how all this works - or fails to work. MS-RELEP is comprehensive in that it contains both key content review and testing practice. And the text review is Mississippi-specific - not just simplistic national content, but terse, relevant and accurate Mississippi laws and regulations presented as a well-organized set of state 'key point reviews' ideal for pre-test memorization. But let's not dismiss the importance of the national content either. MS-RELEP's national key point reviews are a succinct compression of tested national principles and practices that comprise the national portion of state license exams from coast to coast. Our content is drawn from our own national textbook, Principles of Real Estate Practice - one of the most widely used principles textbooks in the country. Finally, our national content, as well as our question selection, is further tailored to the state testing outline promulgated by PSI for Mississippi. Thus the breadth and depth of the law reviews and test questions reflect the topic emphasis of your state's testing service and your Mississippi license exam. A word about the test questions... MS-RELEP's testing practice section consists of ten national practice tests, six state practice tests, and one state exam sample test. The practice tests are roughly 50 questions in length and the sample test is 100 questions. The test questions are designed to cover the content covered by the law reviews - which reinforces your learning of the total body

of information tested by your state exam. The questions are direct, to the point, and designed to test your understanding. When you have completed a given test, you can check your answers against the answer key in the appendix. You may also note that each question's answer is accompanied by a brief explanation, or "rationale" to further reinforce your understanding. In the end, as you know, it's all up to you. Unlike other publications, we are not going to tell you that using this book will guarantee that you pass your state exam. It still takes hard work and study to pass. But we have done our best here to get you ready. Following that, the most we can do is wish you the best of success in taking and passing your Mississippi real estate exam. So good luck!! Students looking for a Mississippi-specific real estate principles textbook can now purchase Principles of Real Estate Practice in Mississippi.

"A book perfect for this moment" –Katherine M.

O'Regan, Former Assistant Secretary, US Department of Housing and Urban Development More than fifty years after the passage of the Fair Housing Act, American cities remain divided along the very same lines that this landmark legislation explicitly outlawed. *Keeping Races in Their Places* tells the story of these lines—who drew them, why they drew them, where they drew them, and how they continue to circumscribe residents' opportunities to this very day. Weaving together sophisticated statistical analyses of more than a century's worth of data with an engaging, accessible narrative that brings the numbers to life, *Keeping Races in Their Places* exposes the entrenched effects of

redlining on American communities. This one-of-a-kind contribution to the real estate and urban economics literature applies the author's original geographic information systems analyses to historical maps to reveal redlining's causal role in shaping today's cities.

Spanning the era from the Great Migration to the Great Recession, *Keeping Races in Their Places* uncovers the roots of the Black-white wealth gap, the subprime lending crisis, and today's lack of affordable housing in maps created by banks nearly a century ago. Most of all, it offers hope that with the latest scholarly tools we can pinpoint how things went wrong—and what we must do to make them right.

This new text explains the body of real estate law and real estate ethics that are important to the day-to-day practice of real estate with an emphasis on fair housing, full-disclosure and laws governing real estate licensees. It also teaches users how to perform important real estate procedures such as filling out a listing agreement, preparing presentation packages, as well as the real estate practitioner's role in procedures including obtaining escrows, tax and title information and financing. Finally, the many employment options for California real estate professionals are explained in detail. This text is for a pre-licensing course *California Real Estate Practice*.

Housing is an essential, but complex, product, so complex that professionals involved in its production, namely, architects, real estate developers and urban planners, have difficulty agreeing on "good" housing outcomes. Less-than-optimal solutions that have resulted from a too narrow focus

on one discipline over others are familiar: high design that is costly to build that makes little contribution to the public realm, highly profitable but seemingly identical “cookie-cutter” dwellings with no sense of place and well-planned neighborhoods full of generically designed, unmarketable product types. Differing roles, languages and criteria for success shape these perspectives, which, in turn, influence attitudes about housing regulation. Real estate developers, for example, prefer projects that can be built “as-of-right” or “by-right,” meaning that they can be approved quickly because they meet all current planning, zoning and building code requirements. Design-focused projects, heretofore “by-design,” by contrast, often require time to challenge existing regulatory codes, pursuing discretionary modifications meant to maximize design innovation and development potential. Meanwhile, urban planners work to establish and mediate the threshold between by-right and by-design processes by setting housing standards and determining appropriate housing policy. But just what is the right line between “by-right” and “by-design”? *By-Right, By-Design* provides a historical perspective, conceptual frameworks and practical strategies that cross and connect the diverse professions involved in housing production. The heart of the book is a set of six cross-disciplinary comparative case studies, each examining a significant Los Angeles housing design precedent approved by-variance and its associated development type approved as of right. Each comparison tells a different story about the often-hidden relationships among the three primary disciplines shaping the built environment, some of which uphold, and others of which transgress, conventional disciplinary stereotypes.

Marking the renaissance of social geographies in recent years, this major textbook showcases the breadth of conceptual and empirical approaches that scholars now utilize to understand contemporary social issues through a spatial lens. The book is collectively authored by one of the largest groups of social geographers in the world. It develops a vision of social geographies that is rooted in the commitments that have characterised the sub-discipline for at least half a decade (e.g. society-space relations, justice, equality), while incorporating new approaches, theories and concerns (e.g. emotions, performance, and the more-than-human). Embracing the increasing porosity of our work with neighbouring economic, cultural, political and environmental geographies, the book provides a round-up of the state of the sub-discipline, capturing recent directions and charting new questions and challenges for theory, research and practice. It makes sense of the bewildering variety of contemporary social geographical interests, from longstanding topics (e.g. race, class and gender) to more recent interests (e.g. sustainability, digital worlds and social change). Above all, it makes clear the relevance and contributions of social geographies not
