This book was written because God told me I want you to put on paper what I've been showing you. These words bring life, not condemnation; truth, not deception; hope, not despair. They are words from the Tree of Life, giving us hope, value, identity, and purpose. Many of the counterfeit religious thoughts, misconceptions, faulty human reasoning, and lies that may be embraced are exposed. These things prevent us from seeing ourselves as God sees us and from seeing the vision God has for us. Much of the church has adopted a worldly mindset, leading us to irrelevancy. As each member in the body of Christ focuses their mind on Jesus, hearts and minds are renewed, and vision is restored. We must be like-minded, united in spirit and purpose, so we ultimately finish what Jesus started.

The story of the eventful and controversial life of Margery Kempe - wife, mother, businesswoman, pilgrim and visionary - is the earliest surviving autobiography in English. Here Kempe (c.1373-c.1440) recounts in vivid, unembarrassed detail the madness that followed the birth of the first of her fourteen children, the failure of her brewery business, her dramatic call to the spiritual life, her visions and uncontrollable tears, the struggle to convert her husband to a vow of chastity and her pilgrimages to Europe and the Holy Land. Margery Kempe could not read or write, and dictated her remarkable story late in life. It remains an extraordinary record of human faith and a portrait of a medieval woman of unforgettable character and courage.

The roots of social justice run deep -- right back to the Bible. Now, in *Informing the Future*, scripture scholar, writer and teacher Joseph A. Grassi takes readers back to the New Testament to explore the place of social justice -- the just distribution of economic, social and cultural resources to all people -- as envisioned and practiced in its pages. It is there, the author demonstrates, that we will find the inspiration that challenges us, sustains us and brings hope to our world today. Book jacket.

Since 1980, depth psychologist Bill Plotkin has been guiding women and men into the wilderness — the redrock canyons and snow-crested mountains of the American West — but also into the wilds of the soul. He calls this work soulcraft. There's a great longing in all people to uncover the secrets and mysteries of our individual lives, to find the unique gift we were born to bring to our communities, and to experience our full membership in the more-than-human world. This journey to soul is a descent into layers of the self much deeper than personality, a journey meant for each one of us, not just for the heroes and heroines of mythology. A modern handbook for the journey, *Soulcraft* is not an imitation of indigenous ways, but a contemporary nature-based approach born from wilderness experience, the traditions of Western

culture, and the cross-cultural heritage of all humanity. Filled with stories, poems, and guidelines, Soulcraft introduces over 40 practices that facilitate the descent to soul, including dreamwork, wilderness vision fasts, talking across the species boundaries, council, self-designed ceremony, nature-based shadow work, and the arts of romance, being lost, and storytelling.

Life's too Short to Be an Underdog is the story of a boy and his dog and another dog and yet another one well, several more after that. Author Dave Smith boldly reveals the sometimes confusing, occasionally tragic, but always amusing history of the "Smith Family Dog Curse". For so many years the family was denied in their attempts to cultivate a lasting bond with any dogs because of a series of mysterious events. In the midst of the family's pain and heartache, one dog managed to beat the curse and became the inspiration of many spiritual insights for his beloved master. Dave opens up the family history book and invites you to laugh along, secretly hoping it doesn't cost him the vast family inheritance. Life's too Short to Be an Underdog is a book to share with friends, family, pet lovers, the criminally insane, and anyone else who knows how to read. It will bring smiles to faces of those who remember their own favorite doggie memories and challenge them to look for God's leading in the little things of life even in the sometimes bizarre antics of a little dog named Ballpark.

In this classic satire of small-town America, a young newlywed encounters bigotry, hypocrisy, and complacency when she attempts to transform Gopher Prairie, Minnesota, into a place of beauty and culture.

Consider that you were asked how to ensure human survival. Where would you begin? Conservation of resources jumps to mind. We need to conserve resources in order that economic activities may continue. Alas, this is a false start. Resources are always defined by a given economic system, and only it determines what is and what is not a resource. Therefore, conserving resources implies only the perpetuation of the appropriate economic system. Conservation of resources as we know them has nothing to do with the survival of mankind, but it has very much to do with the survival of the industrial system and society we live in today. We have to start, therefore, at a more basic level. This level, some may argue, is addressed by ensuring for human beings "clean genes." Again, this is a mistaken beginning. It is thoroughly mistaken for reasons of science. It is a false start because malfunctioning organs and morphological structures are not

only due to deleterious hereditary factors but particularly due to unfavorable environments during early growth and development. Moreover, eugenics is not acceptable to any but a small fraction of society. Eugenics may not be irrelevant to our future, but is premature and should be of little concern until we understand how human genes and environment interact.

The period up to the Cold War of the late twentieth century was a time of great social, economic, political, and religious changes. New discoveries in medicine eliminated epidemics and increased life expectancy. Inventions such as the automobile, telephone, radio, television, airplanes and rocketry revolutionized our lives. We experienced major world wars and the disaster of a great depression. Millions of people emigrated to the United States during this time, seeking personal freedom, ownership of property,

stable family lives and a chance to prosper It's God's Will describes the life of an Irish immigrant girl who lived for almost one hundred years during this great period of change. Through it all she never swayed from her beliefs in a supreme being, the power of prayer, the closeness of family, and the necessity to serve her country. Her prayers, precepts and goals are still applicable today.

Bracketed by the catastrophes of the Great War and the Wall Street Crash, 1920s America was a place of drama, tension and hedonism. It glittered and seduced: jazz, flappers, wild all-night parties, the birth of Hollywood, and a glamorous gangster-led crime scene flourishing under prohibition. But the period was also punctuated by momentous events - the political show trials of Sacco and Vanzetti; the huge Ku Klux Klan march down Washington DC's Pennsylvania Avenue - and it produced a splendid array of writers, musicians and film stars, from F. Scott Fitzgerald to Bessie Smith and Charlie Chaplin.

A quiet book about how an intensely deceptive movement can begin, with its almost innocent origins buried deeply in the hopes and fears of good people. Quickening Dreams is the first book in the Deceiving the Elect series, introducing us to a cast of quirky, lovable characters, both good and bad. This book speaks to that growing feeling of uncertainty, deep in your heart, where you are beginning to question the reality of this world, and the religion your parents taught you. In distant echoes you are beginning to hear the still, small voice, and perhaps you are one of the very few that is having odd dreams, dreams that seem to waken you, and bring you to life.

This book provides a comprehensive picture of Venice's shipping industry from the days of glory to its definitive decline, challenging the accepted hierarchy of the political, economic, and environmental factors impacting the history of the maritime republic.

In this short novel, Mrs. Bunny and a cast of characters take a small bakery and turn it into a large publicly traded company. The capacity of human beings to invent, construct and use technical artifacts is a hugely consequential factor in the evolution of society, and in the entangled relations between humans, other creatures and their natural environments. Moving from a critical consideration of theories, to narratives about technology, and then to particular and specific practices, Technofutures, Nature and the Sacred seeks to arrive at a genuinely transdisciplinary perspective focusing attention on the intersection between technology, religion and society and using insights from the environmental humanities. It works from both theoretical and practical contexts by using newly emerging case studies, including geo-engineering and soil carbon technologies, and breaks open new ground by engaging theological, scientific, philosophical and cultural aspects of the technology/religion/nature nexus. Encouraging us to reflect on the significance and place of religious beliefs in dealing with new technologies, and engaging critical theory common in sociological, political and literary discourses, the authors explore the implicit religious claims embedded in technology.

Matej's Legacy is a nonfiction chronicle following the author's Czech family through 20th-century history. It is a sequel to Matej's Journey to America that creatively traced the Chmelkas to biblical times, and then journeyed with them through six millennia from present-day Iraq, to the Czech Republic, and finally to America. The author's great-great-grandfather was born as the Rocky Mountain fur trade boomed in 1825, and grew up on a 13-acre farm in Moravia where the Chmelkas had been serfs since Charlemagne was crowned the first Holy Roman Emperor. Gold, homesteads and Texas longhorns lured thousands of oppressed Europeans to America in the mid-1800s, riding on steamships and railroads that now made long-distance travel feasible. Prussia established its European dominance in 1871 when railroads closed by war reopened to civilians, allowing Matej to flee his beloved motherland for a free homestead in Nebraska. He found a difficult life on the prairie with grasshoppers, drought, hail and fires destroying crops—spurring his 14-year-old son to join a Texas cattle drive and then to dodge Indians and gunfighters throughout the romantic era of the Wild West. Matej died in 1902, leaving his family little wealth, but a legacy, the first 100-years of which is covered in this book. Henry Ford, the Wright brothers, Thomas Edison and other inventors were creating a New World, and the Czechs finally found independence thanks to World War I, which put an end to feudalism but gave birth to Communism. Technology in transportation, agriculture and communications continued to expand during the Roaring Twenties, and a Democratic America became the hope to millions still victimized by brutal dictators. Good times gave way to the Great Depression and the author was born on a primitive Nebraska farm as a new war spread around the globe. Germany and Japan were brought to their knees, but the world was introduced to nuclear horror and was soon threatened by Russian, Chinese, Korean and Vietnamese Communists—ungrateful allies vowing to bury American Capitalism. The Middle East and Africa were now freed from European colonialism, but instead of developing natural resources for the benefit of their citizens,

rival leaders wallowed in tribal warfare. Israel became the incendiary target for Muslims who controlled much of the world's oil, now in great demand as the automobile and airplane gave new mobility to man. As the world's leader, America became its policeman, taking on one evil empire after another. Korea and Vietnam were not proud moments, yet Communism fell to economic demands that only Democratic Capitalism could meet. The Czech Republic and the entire Russian Bloc were suddenly free, but as the world relaxed, a war of terror began, financed by Arab oil and executed by Muslim extremists. Outmatched in technology, failing regimes retreated to guerilla warfare, determined to outlast a culture softened by instant gratification. Lebanon, Palestine, Yugoslavia, Afghanistan and Iraq became major hotspots while Africa simmered under tribal warfare with millions dying from AIDS and starvation. Matej's Legacy integrates the world events of the past 100 years with the Chmelka family story, including the author's journey from farm boy to engineer and executive in the automotive and aerospace industries. He retired in 1997 and began writing a two-volume epic, concluding in 2003 when the United States remained the world's primary protector; but sadly, often criticized and hated by cynics and political opportunists. American immigrants are generally grateful for the opportunities and freedom our great country offers, and many of the world's downtrodden continue their desperate journeys to our shores. Others jealously preach hatred and death to America, but as descendants of those who sacrificed much to be here, let us never forget our legacy.
