Today's critical care nurse needs a variety of skills and the ability to work with very different types of patients. The Basic Critical Care Training Program is designed for any nurse who wishes to obtain the solid foundation of skills and knowledge needed to safely and effectively care for the critically ill patient. Nurses who are just beginning their careers, nurses currently working with critically ill patients, and nurses who wish to change their clinical emphasis and begin working in critical care units are excellent candidates for this program. This program allows you to study when you want to and to practice valuable critical thinking skills prior to taking care of patients. This 75-contact-hour program is accredited by the American Nurses Credentialing Center (ANCC) Commission on Accreditation and is designed to be coordinated with a well-designed preceptor/mentor training program in a critical care unit. The program is based on the textbook recommended! by the American Association of Critical Care Nurses: *AACN Clinical Reference for Critical Care Nursing*. That textbook is required for the course and must be purchased separately. The course consists of 28 modules, as follows: Cardiac (5 modules), Respiratory (6 modules), Neurological (5 modules), Gastrointestinal (3 modules), Hematology (2 modules), Endocrine (2 modules), Renal (2 modules), Special (3 modules). Each module consists of questions referring to material presented in the text. Upon completion of this course, you will be able to provide safe, entry-level critical care nursing practice as you begin working with a preceptor/mentor in a critical care unit. Completing the Basic Critical Care Training Program will distinguish you as a knowledgeable, skilled, and committed professional.

Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Called to Existence through Love... for Love is the "do-it-yourself" version of an introductory class on John Paul II's thought that has had a long and lively run. This tutorial is for those who like to poke their noses into places where they "don't belong," in this case, material considered too difficult for "non-academic" persons to comprehend. Although the target audience is the inquiring, motivated Catholic, the content is universal—one does not have to be Catholic to benefit from the thought of John Paul II and other notable sages like Edith Stein, Dietrich von Hildebrand, and Paul VI. Welcome to a timely look at love and truth, marriage and family!

A remarkable exploration of the best in written works from around the world is at the heart of an amazing new literature series from respected educator and author, Dr. James Stobaugh. Contains concept building exercises for warm-up, suggested reading lists and schedules, writing activities for enrichment, biblical applications and special project and critical thinking exercises. Comprehensive and complete to allow for a year's worth of study. Structured to stand alone or be integrated into a comprehensive curriculum, designed to present a strong sample of literature to help the Christian student from a strong and biblical worldview.

This practical handbook for designing and teaching hybrid or blended courses focuses on outcomes-based practice. It reflects the author's experience of having taught over 70 hybrid courses, and having worked for three years in the Learning Technology Center at the University of Wisconsin-Milwaukee, a center that is recognized as a leader in the field of hybrid course design. Jay Caulfield defines hybrid courses as ones where not only is face time replaced to varying degrees by online learning, but also by experiential learning that takes place in the community or within

an organization with or without the presence of a teacher; and as a pedagogy that places the primary responsibility of learning on the learner, with the teacher's primary role being to create opportunities and environments that foster independent and collaborative student learning. Starting with a brief review of the relevant theory – such as andragogy, inquiry-based learning, experiential learning and theories that specifically relate to distance education – she addresses the practicalities of planning a hybrid course, taking into account class characteristics such as size, demographics, subject matter, learning outcomes, and time available. She offers criteria for determining the appropriate mix of face-to-face, online, and experiential components for a course, and guidance on creating social presence online. The section on designing and teaching in the hybrid environment covers such key elements as promoting and managing discussion, using small groups, creating opportunities for student feedback, and ensuring that students' learning expectations are met. A concluding section of interviews with students and teachers offers a rich vein of tips and ideas.

This comprehensive, respected, and up-to-date survey of contemporary behavior therapy synthesizes the clinical, research, theoretical, and ethical facets of behavior therapy. Serving as both an introduction for beginning students and as a scholarly review and resource for advanced students, CONTEMPORARY BEHAVIOR THERAPY, Sixth Edition covers all the major behavioral and cognitive therapies. The wealth of case studies illustrates the application of behavior therapy techniques to a wide array of problems and clinical populations. The text's multidisciplinary approach includes applications to diverse fields, including psychology, education, social work, nursing, and rehabilitation. Enjoy beloved classics while developing vocabulary, reading, and critical thinking skills! Each literature book in the series is a one-year course. Each chapter has five lessons with daily concept-building exercises, warm-up questions, and guided readings. Easy-to-use with suggested reading schedules and daily calendar. Equips students to think critically about philosophy and trends in culture, and articulate their views through writing. A well-crafted presentation of whole-book or whole-work selections from the major genres of classic literature (prose, poetry, and drama), each course has 34 chapters representing 34 weeks of study, with an overview of narrative background material on the writers, their historical settings, and worldview. The rich curriculum's content is infused with critical thinking skills, and an easy-to-use teacher's guide outlines student objectives with each chapter, providing the answers to the assignments and weekly exercises. The final lesson of the week includes both the exam, covering insights on the week's chapter, as well as essays developed through the course of that week's study, chosen by the educator and student to personalize the coursework for the individual learner.

The author team (Ivancevich/Konopaske/Matteson) has examined, listened, and responded to reviewers', instructors', and students' suggestions on how to continue to make Organizational Behavior and Management, 8e a more user-friendly and application rich introductory OB textbook. To accomplish this, OBM 8e achieves the difficult goal of preserving its key strengths (i.e., thorough, current, good balance of research and practice) while streamlining its content by removing over 100 pages of readings that are now available on the Web. This reduction in page length makes the book more affordable, teachable, and efficient for students. "Preserving scholarship while streamlining" captures the spirit of what I/K/M used as the guiding principle while writing OBM 8e.

Successful fire service leaders know that a fire department that isn't moving forward is dying or, at least, in danger of dying. In this second edition, author Mark Wallace succinctly points out that if you don't know where you're going, any road will take you there. Fire departments that know where they are going, know the environment in which they must operate, and have identified how to get there have the best chance of achieving their goals and desires. These concepts form the foundation of strategic planning. They challenge fire chiefs to escape from the typical operational thinking, to begin strategic thinking, and ultimately to manage their organizations strategically. Readers will learn about the strategic planning process and why each of the steps in the process is critical if the plan is to succeed. More importantly, while the strategic planning process may be thought of as extremely complicated this book remove the mystery that some think of when considering strategic planning by providing timely advice and easy to use tools to assist in the strategic planning process.

"This book was written to help preprofessional students make healthy choices about entering the field of physical therapy, to assist physical therapy students to establish sound habits and realistic expectations, and to facilitate success for new graduates in the transition from the the academic setting to clinical practice. Clinical and academic faculty may also find these ideas useful in advising students at various stages in the professional education process." (Preface).
