This first account of commercial spaceflight’s most successful venture describes the extraordinary feats of engineering and human achievement that have placed SpaceX at the forefront of the launch industry and made it the most likely candidate for transporting humans to Mars. Since its inception in 2002, SpaceX has sought to change the space launch paradigm by developing a family of launch vehicles that will ultimately reduce the cost and increase the reliability of space access tenfold. Coupled with the newly emerging market for governmental, private, and commercial space transport, this new model will re-ignite humanity's efforts to explore and develop space. Formed in 2002 by Elon Musk, the founder of PayPal and the Zip2 Corporation, SpaceX has already developed two state-of-the-art new launch vehicles, established an impressive launch manifest, and been awarded COTS funding by NASA to demonstrate delivery and return of cargo to the ISS. This book describes how simplicity, low-cost, and reliability can go hand in hand, as promoted in the philosophy of SpaceX. It explains how, by eliminating the traditional layers of internal management and external sub-contractors and keeping the vast majority of manufacturing in house, SpaceX reduces its costs while accelerating decision making and delivery, controls quality, and ensures constant liaison between the design and manufacturing teams. "The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset. Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.

England's history retold for the modern age—from Caesar to Brexit via Conquest, Empire, and world wars In nations across the world, political divides seem to loom wider than ever before. Whether in the United States or England, many people are frustrated with the inability of different ideologies, or even different regions of the same country, to find a middle ground and understand each other's viewpoints. It's easy to see this extreme polarization as a modern phenomenon—but looking closely at English history reveals that this North Atlantic nation has been deeply divided across 2,000 years (and even before the first humans made its land their home). England's historical and present dominance over the other countries in the UK means this split reverberates across the entire kingdom, with repercussions for all its interactions on the global stage. Every moment of England's past is colored by its geographical and cultural split into two regions—north and south. As the country dealt with outside pressures such as colonizing Romans, Germanic settlers, and Danish and Norman invaders over the centuries, it also faced a battle within between the more privileged southern elite and the northern people who resisted southern domination. The Shortest History of England links these earlier struggles to England's uncertain present and future, with fascinating aspects of the nation's history playing starring roles, such as: The constant political tug-of-war between the crown and Parliament, with a beheaded king and the Magna Carta at the center Linguistic conflict between the haves and the have-nots as French became the language of the elite, leading to the Frenchified Northern way of speaking "correct" English still dominating today Wars, wars, and more wars—from the Hundred Years' War between England and France to the Wars of the Roses between northern and southern England to World War I and II Religious battles as the Reformation split the country into Catholic versus Protestant The rise of an empire stretching across America, India, Africa, and Australia—and its fall Populism's modern ascendancy with the help of Prime Ministers Margaret Thatcher and Nigel Farage as well as the UKIP party The empire's decline from the inside, with Ireland breaking away from the UK, the UK breaking away from the EU, and Scottish independence. All these events and more are conveyed in James Hawes's succinct, incisive voice, accompanied by over 150 maps, images, and diagrams. The Shortest History of England offers the most direct and compelling route to understanding the division driving the events of modern-day England—and those of many other countries in the Western world.
