'It is hard to imagine a more enticing topic: why some Japanese firms succeeded in the 1990s despite an economy that failed. The answers are both common sense - operational effectiveness and CEO leadership - and Japan specific - break with traditions. The lessons about leadership, in particular, have wider relevance for leaders, managers, consultants and academics.' - Andrew Campbell, Ashridge Strategic Management Centre, UK Transformational CEOs questions why some Japanese firms succeeded in the 1990s despite an economy that failed - regardless of the burst of the 'bubble' economy, a number of Japanese companies have maintained or extended their international leadership in particular sectors. The authors argue that whilst some of the reasons for successes are plain common sense - operational effectiveness and superior CEO leadership - some are Japan-specific and point to a break with traditional leadership rationale.

The first of two volumes covering the French armor of World War II, this title looks at the infantry and battle tanks that faced the onslaught of the German Blitzkrieg in 1940. Many of the French tanks were intended as replacements for the World War I-era Renault FT, and various modernization efforts throughout the inter-war years had given rise to a number of new infantry tanks, including the Renault R35 and R40, FCM 36, and the Hotchkiss H35 and H39. Alongside these developments was a separate family of battle tanks, starting with the Renault D1, D2, and, finally, the best-known French tank of the campaign – the Char B1 bis. French Tanks of World War II (1) offers a background to the design and development of these tank types, and an evaluation of their performance in the Battle of France.

This book focuses on the development of strategies for the successful internationalization of large and medium-sized companies. Becoming international offers important opportunities for companies of all sizes, but in an increasingly complex environment, the strategic planning involved is also a challenge. The book addresses this, putting forward suggestions that allow large and medium-sized companies to profit from internationalization. After a comprehensive introduction to internationalization and strategic planning, the authors make clear recommendations, suggesting detailed processes for developing international strategies. The book distinguishes between going global for new markets and internationalizing production and sourcing. For both, the book proposes procedures for performing meaningful strategic analyses and for developing successful international strategies. Lastly, it highlights the challenges faced by international companies and discusses useful decision processes. The book offers valuable insights for company executives, participants in Executive MBA programs, and master's students.

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The I-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined

from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

An international history of the automobile plus a detailed description of the outstanding models.

This volume rethinks the work of Jacques Ellul (1912-1994) on the centenary of his birth, by presenting an overview of the current debates based on Ellul's insights. As one of the most significant twentieth-century thinkers about technology, Ellul was among the first thinkers to realize the importance of topics such as globalization, terrorism, communication technologies and ecology, and study them from a technological perspective. The book is divided into three sections. The first discusses Ellul's diagnosis of modern society, and addresses the reception of his work on the technological society, the notion of efficiency, the process of symbolization/de-symbolization, and ecology. The second analyzes communicational and cultural problems, as well as threats and trends in early twenty-first century societies. Many of the issues Ellul saw as crucial – such as energy, propaganda, applied life sciences and communication – continue to be so. In fact they have grown exponentially, on a global scale, producing new forms of risk. Essays in the final section examine the duality of reason and revelation. They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge, which is to say, on the one hand, the experience of the human being as contained in the rationalist, sociological and philosophical traditions. On the other hand there are the transcendent roots of human existence, as well as “revealed knowledge,” in the mystical and religious traditions. The meeting of these two traditions enables us to look at Ellul's work as a whole, but above all it opens up a space for examining religious life in the technological society.

Nowhere can the cataclysmic reversals in international competitiveness since the Second World War be traced more clearly than in the United States, Great Britain, France, Germany, and Japan. Surveying the development of the steel, automobile, and semiconductor industries in each of these countries, Jeffrey A. Hart illuminates the role of national policy in a changing world. Hart describes the global structure of production and consumption in the five major capitalist countries and offers a rich comparative history of their industrial policymaking. He concludes that variations in statesocietal arrangements—and the impact these differences have on the creation and diffusion of new technologies—provide the best explanation for divergences in international competitiveness. In Japan, state and business are allied, but labor is marginalized, whereas in Germany, labor and business are allied, and the state is decentralized. Yet both countries have become increasingly competitive because they have developed institutional mechanisms for technology diffusion. France's state-led system, in contrast, is linked with only moderate competitiveness. The decline of competitiveness in the United States and Britain, Hart concludes, may be attributed to state-societal arrangements that have allowed one actor-labor in Britain, business in the United States-to dominate policymaking. *Rival Capitalists* will be an invaluable source for policymakers and business analysts as well as scholars and students of political economy, international relations, industrial organization, industrial sociology, and comparative politics.

A year's worth of vital industry data plus analysis that helps you plan for the future.

The APIL Guide to Accidents Abroad is a major new addition to the APIL Guides series, looking in detail at a highly technical and difficult aspect of personal injury practice. Written by leading lawyers in the field, it covers the Package Travel Regulations, jurisdiction and applicable law, direct action against insurers, shipping and aviation claims, and damages. In keeping with the APIL Guides series, it takes a practical approach providing all the information needed to conduct a claim. The authors' explanatory commentary is supplemented by pleadings and precedents, together with relevant legislation and international materials making this an essential one-stop-shop for conducting PI claims with an international element.

John Kenneth Galbraith was an eminent economist and proponent of change. The contributors to the book further his analysis on the evolution of capitalism; taking into account changes to the general economic climate since the publication of J.K. Galbraith's main thesis, they outline new ideas which form fertile ground for new research. The book begins with a penetrating analysis of the main features of today's capitalism and in particular the conflict between shareholders and managers. It moves on to focus on the consequences of globalization in the decision-making processes of large corporations and represents an important step in the development of a theory of fraud and corruption within corporations. In the final part, the authors address and explore the consequences of the domination of influential groups over major social and political decisions, on the blurred boundaries between the public and the private sectors and its consequences in the fields of technological regulation and the evolution of public services. In so doing, the authors question the meaning and power of democracy in today's society. *Innovation, Evolution and Economic Change* will appeal to a wide readership and audience of economists, policy makers and political organization.
