In 2011, Tim Cook took on an impossible task - following in the footsteps of one of history's greatest business visionaries, Steve Jobs. Facing worldwide scrutiny, Cook (who was often described as shy, unassuming and unimaginative) defied all expectations. Under Cook's leadership Apple has soared: its stock has nearly tripled to become the world's first trillion-dollar company. From the massive growth of the iPhone to new victories like the Apple Watch, Cook is leading Apple to a new era of success. But he's also spearheaded a cultural revolution within the company. Since becoming CEO, Cook has introduced a new style of management that emphasizes kindness, collaboration and honesty, and has quietly pushed Apple to support sexual and racial equal rights and invest heavily in renewable energy. Drawing on authorized access with several Apple insiders, Kahney, the world's leading reporter on Apple, tells the inspiring story of how one man attempted to replace the irreplaceable and succeeded better than

anyone thought possible. Leander Kahney has covered Apple for more than a dozen years and has written four popular books about Apple and the culture of its followers, including *Inside Steve's Brain* and *Jony Ive*. The former news editor for *Wired.com*, he is currently the editor and publisher of *CultofMac.com*. He lives in San Francisco.

But success is very relative, not necessarily the result of a sequence of great ideas and uncompromising effort. It is often the outcome of flashes of brilliant behavior, belief, attitude, and approach that each of us demonstrates in our daily lives, often without any training or realization. Once we become aware of these traits and transform them into sustainable habits, success starts to unfold. This book is a daisy chain of easy flowing chapters with examples from the workplace, sports, movies, and life in general that nudge the reader toward these flashes of brilliance—brilliance that can be repeated and help construct fulfilling and rewarding outcomes. This is a book not only for the professional trying to build a successful career. It is directed at anyone anywhere, doing anything with the intention of being good at it.

"From Latin Americas coffe and Thai silks to Danish furniture and Hollywood films, geographical associations add untold meaning and value to commodities. Yet while social science research has long focused on the 'Country of Origin' and its inextricable links to consumer behaviour, it has failed to develop critical ways of thinking about the geographies of brands, and branding that encompass and extend beyond this national frame. *Origination: The Geographies of Brands and Branding* addresses this gap by introducing the innovative theoretical and conceptual framework of origination to understand how actors involved in commodity brands and branding create meaning and value through processes of geographical association. To illustrate concepts and facilitate understanding, origination is explored through an in-depth analysis of Newcastle Brown Ale; 'national' origination is addressed by examination of the iconic Burberry brand; and 'global' origination is discussed in relation to the Apple brand. Through rigorous research, *Origination: The Geographies of Brands and Branding* provides innovative insights into the integral role of geographical associations in creating meaning and value in brands and branding in the contemporary international economy"--Jacket.
