One diver, after a seemingly brief period below the surface, discovers that his gas supply has run perilously low. Another, paralyzed, bobs helplessly on the surface, and when a poorly trained divemaster attempts rescue, things go from bad to worse. Two other divers, fascinated by the bountiful undersea life of the Caribbean, fail to notice that a powerful current is sweeping them rapidly away from their unattended boat.

These are just a few of the true stories you'll find in *Diver Down*, most of them involving diver error and resulting in serious injury or death. Each of these tales is accompanied by an in-depth analysis of what went wrong and how you can recognize, avoid, and respond to similar underwater calamities. This unique survival guide explores the gamut of diving situations, including cave and wreck diving, deep-water dives, river and drift diving, decompression sickness, and much more. It shows you how to prevent tragic mishaps through:

- Inspection and maintenance of primary and secondary diving gear
- Learning and following established safety protocols
- Confirming the training and credentials of diving professionals
- Practicing emergency responses under real-world conditions

Read the diver's enthralling account of the Thai cave rescue.

'Riveting...a powerful story written by a hero who lived it.'

RON HOWARD, Oscar-winning director of *Apollo 13*

'A profound and thrilling read.'

COLIN FARRELL In this first-hand account, John Volanthen reveals how he pushed the limits of human endurance in the life-or-death mission to rescue the Thai youth soccer team trapped in the flooded cave. The world held its breath in 2018 when the Wild Boars soccer team and their coach went missing deep underground in the Tham Luang cave complex in northern Thailand. They

had been stranded by sudden, continuous monsoon rains while exploring the caves after practice. With torrential rain pouring down and the waters still on the rise, an army of rescue teams and equipment was deployed, including Thai Navy SEALs, a US Air Force special tactics squadron, police sniffer dogs, drones and robots. But it was British cave diver John Volanthen and his partner, Rick Stanton, who were first to reach the stranded team and who played a key role in their ultimate rescue. As John's light flickered from one boy to another, he called out, 'How many of you?' 'Thirteen,' a boy answered. After 10 days trapped in desperate darkness, the boys and their coach were all alive. Each chapter of *Thirteen Lessons that Saved Thirteen Lives* tells one part of the edge-of-your-seat mission from Tham Luang but also imparts a life lesson, gleaned from John's previous rescues and record-breaking cave dives, that can be applied to everyday obstacles and challenges. In this story of breathtaking courage and nerves of steel, John reveals how responding positively to the statement, 'But I can't...' by stating, 'I can,' led to one of the most incredible rescues of all time. He hopes that his story will inspire the superhero in you. Meanwhile, he is always on standby for the next rescue. These short travel essays from around the globe get to the heart of what the words travel and adventure really mean. In *Search of Adventure* explores the good, the bad, and the ugly of what travelling the world has to offer. The "Trampled Underfoot" section features tales of woe on the road -- the worst of the worst, or making the best of the worst. In "Global Issues & Viewpoints," authors explore the changing world, oppressive governments, and the homogenising of world cultures. From warm and inviting to raw and shocking, these non-fiction travel pieces present disparate viewpoints on the diverse world in which we live and leave no emotion untouched.

women in her field—Into the Planet blends science, adventure, and memoir to bring readers face-to-face with the terror and beauty of earth's remaining unknowns and the extremes of human capability. Jill Heinerth—the first person in history to dive deep into an Antarctic iceberg and leader of a team that discovered the ancient watery remains of Mayan civilizations—has descended farther into the inner depths of our planet than any other woman. She takes us into the harrowing split-second decisions that determine whether a diver makes it back to safety, the prejudices that prevent women from pursuing careers underwater, and her endeavor to recover a fallen friend's body from the confines of a cave. But there's beauty beyond the danger of diving, and while Heinerth swims beneath our feet in the lifeblood of our planet, she works with biologists discovering new species, physicists tracking climate change, and hydrogeologists examining our finite freshwater reserves. Written with hair-raising intensity, Into the Planet is the first book to deliver an intimate account of cave diving, transporting readers deep into inner space, where fear must be reconciled and a mission's success balances between knowing one's limits and pushing the envelope of human endurance.
