In the 80th Century, the status-quo of Earth's galactic empire must be maintained at any cost, and no human may be killed without a fearful penalty. Yet Christopher Adams, chief of the Dept, of Galactic Investigation, has learned that several men on Aldebaran XII have been killed in an impossible accident, thus breaking both supreme rules. As Adams worries, a stranger appears and states that he is Adams' successor, returned from the future to warn him. Adams knows of only one insignificant experiment in time travel and does not believe him. The stranger says that Asher Sutton, an agent of Adams' is about to return from 61 Cygni after 20 years . . . and must be killed when he lands. So begins Clifford D. Simak's epic tale of time travel and destiny. This is the original version of the novel *Time and Again*, serialized in the first three issues of *Galaxy Magazine* in 1950, and featuring a different ending than the novel version.

This is the complete English version of Eliphas Levi's treatise on ritual magic. This work is in two parts: in the first one, called "The Doctrine of Transcendental Magic", we establish the kabalistic and magical doctrine in its entirety; this here, the second part, is consecrated to the cultus, that is, to Ceremonial Magic. The one is that which the ancient sages termed the Clavicle, the other that which people on the country-side still call the Grimoire. The numbers and subjects of the chapters which correspond in both parts, are in no sense arbitrary, and are all indicated in the great universal key, of which we give for the first time a complete and adequate explanation. Let this work now go its way where it will and become what Providence determines; it is finished, and we believe it to be enduring, because it is strong, like all that is reasonable and conscientious. Contents: Introduction Chapter I - Preparations Chapter Ii - Magical Equilibrium Chapter Iii - The Triangle Of Pantacles Chapter Iv - The Conjunction Of The Four Chapter V - The Blazing Pentagram Chapter Vi - The Medium And Mediator Chapter Vii - The Septenary Of Talismans

What will the future look like? To judge from many speculative fiction films and books, from Blade Runner to Cloud Atlas, the future will be full of cities that resemble Tokyo, Hong Kong, and Shanghai, and it will be populated mainly by cold, unfeeling citizens who act like robots. Techno-Orientalism investigates the phenomenon of imagining Asia and Asians in hypo- or hyper-technological terms in literary, cinematic, and new media representations, while critically examining the stereotype of Asians as both technologically advanced and intellectually primitive, in dire need of Western consciousness-raising. The collection's fourteen original essays trace the discourse of techno-orientalism across a wide array of media, from radio serials to cyberpunk novels, from Sax Rohmer's Dr. Fu Manchu to Firefly. Applying a variety of theoretical, historical, and interpretive approaches, the contributors consider techno-orientalism a truly global phenomenon. In part, they tackle the key question of how these stereotypes serve to both express and assuage Western anxieties about Asia's growing cultural influence and economic dominance. Yet the book also examines artists who have

appropriated techno-orientalist tropes in order to critique racist and imperialist attitudes. *Techno-Orientalism* is the first collection to define and critically analyze a phenomenon that pervades both science fiction and real-world news coverage of Asia. With essays on subjects ranging from wartime rhetoric of race and technology to science fiction by contemporary Asian American writers to the cultural implications of Korean gamers, this volume offers innovative perspectives and broadens conventional discussions in Asian American Cultural studies.
