Learn all the lingo; meet the greatest players, managers, and teams from both the men’s and women’s games; take masterclasses with the pros; wander through the haircut hall of fame; learn the most iconic goal celebrations; and more. Written by the team at MUNDIAL, the celebrated soccer lifestyle magazine, and filled with fun, colorful illustrations, The Big Book of Soccer by Mundial covers it all: The basics and the lingo that will have you talking like a soccer expert in no time. History of soccer, including how we got from playing with a ball made of feathers to using high-tech soccer balls, the greatest teams of all time and the evolution of soccer cleats. The great players, including Paolo Maldini, Lev Yashin, Joy Fawcett, Franz Beckenbauer, Johan Cruyff, Michelle Akers, Sir Stanley Matthews, and Marta Vieira da Silva. Legendary managers and how they did it—learn the favorite killer formations of greats like Rinus Michels and Sir Alex Ferguson. The big cups, with their histories and greatest players. The world’s most amazing stadiums, including Wembley, Melbourne Cricket Ground, and San Siro. Uniform hall of fame, from the USSR’s (now Russia) classic red sweatshirt with ‘CCCP’ written across the front to Mexico’s green home shirt with Aztec patterns and the giant face of the Aztec god of death. How to take the perfect shot like Ji So-yun, take the perfect set piece like David Beckham, take penalties like Matt Le Tissier, beat the offside trap like Fernando Torres, do the perfect attacking header like Didier Drogba, and more. Weird and wonderful, from the way we describe things that happen in the game (a fox in the box) to the way we celebrate a goal (by pretending to be a robot) or do our hair (shaving it all off except for a triangle at the front). The culture and people surrounding the game, from traditional pre-game food to the referee, commentator, and all-important crowd. This great big book is your essential guide to the wonderful world of soccer.

The Blizzard is a quarterly football publication, put together by a cooperative of journalists and authors, its main aim to provide a platform for top-class writers from across the globe to enjoy the space and the freedom to write what they like about the football stories that matter to them.

Little Wonder tells the epic, and until now largely unchronicled, story of Lottie Dod, the first great heroine in women's sports. Dod was a champion tennis player, golfer, hockey player, tobogganist, skater, mountaineer, and archer. She was also a first-rate musician, performing numerous choral concerts in London in the 1920s and 1930s, including in a private performance before the King and Queen. In the late 19th century, Dod was almost certainly the second most famous woman in the British Isles, bested only by the fame of Queen Victoria. She was fawned over by the press, and loved by a huge fan base – which composed poems and songs in her honor, followed her from one tournament to the next, voraciously read every profile published on her and every report on her sporting triumphs. Yet, within a decade or two of her retirement from sports, Dod was largely a forgotten figure. She lived, unmarried and childless, until 1960, and for the last half of her life she was shrouded in obscurity. In this new book, Sasha Abramsky brings Lottie's remarkable achievements back into the public eye in a fascinating story of resilience and determination.

America loves sports. This book examines and details the proof of this fascination seen throughout American society—in our literature, film, and music; our clothing and food; and the iconography of the nation.

With loyal fans supporting their major sports teams in the Seahawks (NFL), Mariners (MLB) - plus a rabid fan base for University of Washington jocks - Seattle is a great place for a sports debate. Local sports-radio talker Mike Gastineau teams up with longtime sportswriters Steve Rudman and Art Thiel to bring Seattle sports history to life with this provocative and enjoyable - not to mention debatable - book of lists. They also enlist list contributions by famous players, coaches, and Seattle celebrities including Mike Holmgren, Matt Hasselbeck, Ichiro Suzuki, George Karl, Pearl Jam, Kevin Calabro, Sir Mix-a-Lot, and more.

Today the Victoria Cross remains the supreme British award for bravery. It takes precedence over all other awards and decorations. During its 160-year history, since the first of these medals were given for gallantry during the Crimean War in the 1850's, 1,357 have been won, and no less than 69 of them have gone to Yorkshiremen. Alan Whitworth, in this carefully researched and revealing account, describes in graphic detail the exploits and the lives of this elite group of heroes.

This Battleground Europe 'special' is a fascinating and highly informative guidebook to the Capital which will be invaluable to those who wish to understand what Londoners went through during the Second World War. By means of seven easily manageable walks, the reader is transported back to those dark days of devastating destruction. Using rich anecdotes and first-hand accounts the scale of the Luftwaffe raids becomes apparent and the horror of Hitler's V-weapon attacks unfurls. An original and fascinating way to visit London.

A unique and timely exploration of the cultural impact of sport on American society, including lifestyles, language, and thinking. Sport in American Culture is the first and only reference work to provide an in-depth and up-to-date exploration of sport and its impact on American culture. Essays from more than 200 scholars, professionals, and sports enthusiasts address how sport has changed our lifestyles, language, and thinking. Arranged alphabetically, the work introduces key sport figures and national icons, with a focus on their cultural impact, examines

individual sports and how they have influenced society, and discusses such phenomena as the billion-dollar athletic apparel industry, sport as big business, and the effect of sport on gender, racial views, pride, and nationalism. In addition to expected topics, the work also includes less studied areas such as myths, audience rituals, Wheaties, comic books, the hula hoop, and religion. 400 A–Z entries covering a wealth of topics, including sports heroes, artifacts of sport, culture of consumption, racial discrimination, and gender 200+ distinguished contributors, including academics and professionals from a wide variety of fields Lavish illustrations and photographs support the subject areas and examples covered Extensive bibliographic information with individual reading suggestions for further study

How the experience of war impacted on the town, from the initial enthusiasm for sorting out the German Kaiser in time for Christmas 1914, to the gradual realization of the enormity of human sacrifice the families of Washington were committed to as the war stretched out over the next four years. A record of the growing disillusion of the people, their tragedies and hardships and a determination to see it through. ??The Great War affected everyone. At home there were wounded soldiers in military hospitals, refugees from Belgium and later on German prisoners of war. There were food and fuel shortages and disruption to schooling. The role of women changed dramatically and they undertook a variety of work undreamed of in peacetime. Meanwhile, men serving in the armed forces were scattered far and wide. Extracts from contemporary letters reveal their heroism and give insights into what it was like under battle conditions.

**WINNER OF THE BRITISH SPORT BOOK AWARDS - RUGBY BOOK OF THE YEAR** This is the story of 15 men killed in the Great War. All played rugby for one London club; none lived to hear the final whistle. Rugby brought them together; rugby led the rush to war. They came from Britain and the Empire to fight in every theatre and service, among them a poet, playwright and perfumer. Some were decorated and died heroically; others fought and fell quietly. Together their stories paint a portrait in miniature of the entire War. The Final Whistle plays tribute to the pivotal role rugby played in the Great War by following the poignant stories of fifteen men who played for Rosslyn Park, London. They came from diverse backgrounds, with players from Australia, Ceylon, Wales and South Africa, but they were united by their love of the game and their courage in the face of war. From the mystery of a missing memorial, Cooper's meticulous research has uncovered the story of these men and captured their lives, from their vanished Edwardian youth and vigour, to the war they fought and how they died.

What an amazing journey for Edith and Harold's only Son! I have spent 33 years in the Major Leagues, traveling around the world eating at the best restaurants, such as Tramonti in Delray Beach, Florida to La Scarola in Chicago IL to Hunan Homes in San Francisco, CA. I have shared meals with some of the world's greatest people such as Neil Armstrong, Charles Barkley, Bob Knight, Yogi Berra, Thurman Munson, Stan Musial, Red Schoendienst, Jack Buck and so many more. My spectacular journey includes stories from behind-the-scenes of my professional baseball career that, until now, were only told in clubhouses, dugouts, or when out to dinner with me. Life is a journey...enjoy the meal! Bon Appetit!

In a stressful, turbulent world, sports can be an escape from reality. Yet sport actually mirrors the issues and problems of our world today, bearing the imprint of powerful forces of social change. This book offers a sociological perspective for seeing and understanding the place of sport in society and how it is affected by big business and by demographic, cultural, organizational, economic, political, and technological change. Nixon's main focus is "big-time" commercialized and corporate sport, from Little League Baseball, Inc. to youth club sports, high school and college athletics, and professional and Olympic sports. He writes vividly of the making and unmaking of heroes and celebrities. Throughout he shows how the combined influence of networks of major sports organizations, media corporations, and corporate sponsors is shaping sport around the world.

Commemoration of war is done through sport on Anzac Day to remember Australia's war dead. War, Sport and the Anzac Tradition traces the creation of this sporting tradition at Gallipoli in 1915, and how it has evolved from late Victorian and Edwardian ideas of masculinity extolling prowess on the sports field as fostering prowess on the battlefield.

Throughout the twentieth century, athletic heroes have altered their respective sports with spectacular achievements, renewing their fans' confidence and surpassing their expectations with pioneering fearlessness, powerful expertise and unforgettable performances. In *They Changed the Game*, authors Ken Rappoport and Barry Wilner profile professional sports' trailblazing champions, from boxing great Muhammad Ali to runner extraordinaire Jesse Owens, from stock-car racer Richard Petty to incomparable sportswoman Babe Didrickson. This book explores the deeper meaning of sports. Drawing on contemporary research, the author makes a strong case for why we should see sport not only in terms of religion but--more importantly--as a possible location for spiritual meaning. Taking this a step farther, she considers how gene editing, robotics, and other biomedical technological enhancements affect not only sports performances but experiences of sport as sacred. In addition, the author explores what difference it might make to the enhancement debate if sports' spirituality is taken seriously. The author is not afraid to explore the issue in all its complexity. Yet, the argument she presents is both meaningful and accessible. This investigation applies insights from Christian theology, applied ethics, psychology, and sports studies. From lightweight tennis racquets to anabolic steroids, athletes have long used technology and science to improve their performances. But, until now, no one has asked how biomedical technological enhancements might affect the undervalued spiritual dimension of sport. This book presents rich insights into the connection between sports, spirituality, and human enhancement technologies. It will appeal to researchers, athletes and sports followers, and undergraduate and graduate students in ethics, sport, religion or theology.

This collection of fascinating biographies of outstanding women athletes past and present including superstars such as Nadia Comaneci, Mia Hamm, Jackie-Joyner Kersee, Danica Patrick, and Serena and Venus Williams. \* Photographs of accomplished female athletes \* A chronology helps readers put entries in context \* A bibliography provides suggestions for further reading

Through a series of five walks this book discovers the sights, sounds and experience of the capital at war; it details the remaining tangible evidence of the dark days via air raid shelter signs, bomb damage on buildings and memorials detailing heroic and often tragic events. The new routes cover a wide area of London and reveal further evidence of the experiences of four years air war in the skies above our capital city. The East End & Docks, Greenwich, Holborn, Bermondsey, Southwark and the West End are all featured, along with detailed maps and numerous contemporary photographs that accompany the text for each walk. The book also contains a number of appendices relating to the wider picture of the war. A well deserved story of London's Home Guard is told. A list of Civil Defense casualties that occurred within the boroughs covered by the walks is included as well as a detailed list of the locations of wartime fire and ambulance stations across the capital. This book will appeal to both the enthusiast and anyone with an interest in London's past. It is a further record of the memories and tangible evidence of this dramatic period of our capital's past and a tribute to those who lived through the Blitz and sadly so often, those who

did not."

Life is indeed a game that we all play to pass time; simply a series of days strung together, made up of how you planned or decided to spend the moments. Like any game how well it is played or whether life's circumstances are interpreted accurately, then used to the best advantage, makes losers and winners to varying degrees. Senseless insanity is alive and well within the world. The world is awash with unruly forces, that if not intent upon harming you do desire to become a destabilising force, either temporarily or over the long term. We are all participants in a charade, how life evolves and turns out all depend on how well the game is played. It is not wise or ideal to treat life like a game of chance, a random roll of the dice that can determine unpredictable outcomes. The cost of success is the careful application of well thought out concepts and ideas. Like any game preparation is critical; understanding the rules, knowing how to manipulate the dynamics at play efficiently to ones own advantage, understanding the intricacies of the rules and how to capitalise upon or create opportunities, pursuing whatever circumstances are present to maximise whatever potential exists to the best advantage. The potential opportunities in life are only limited by the inability to firstly comprehend them and secondly to fully utilise personal abilities to maximise the potential that is available. Don't wait for special times to evolve, rather create them in accordance with your true desires to experience what you wish to make real. Much like any game, the game of life has things that can be obtained, or things that can be lost. How the game is played, the value of the stakes, the opposing factions all come to dictate an outcome, be that favourable or lacking any resemblance of being lucky. A life lived based upon any reliance on luck or fate being favourable is tempting only to the over optimistic, or those extremely lucky ones or who were fortunate in the past and believe that good fortune will continue in the future. While it takes resources to control the world, the control of your own specific world environment is really within your potential to achieve. How you choose to control your world, as well as to what extent your desires are put into action, determine whether your life will meet your wishes or not. The amount of thought and energy you exhort, the persistence of that effort, all comes to determine whether and to what degree what you want is what you actually get. In life you may win or loose at times, it's basically just like playing a game; the right mentality is chancing the wheel of life by trusting and ensuring you will win just the same.

VC recipients are a number of outstanding names, including Richard Annand who gained the first VC of the Second World War and Roland Bradford who was one of only four sets of brothers to have secured the VC. He also had the distinction of becoming the youngest general in the British army. But among the roll of the brave whose gallantry and self-sacrifice are celebrated in these pages the reader will find the names and extraordinary deeds of many other men who were either born or bred or lived and died in the North. They will also find the story of the youngest Victoria Cross recipient who won his award aged just nineteen. The stories of these ordinary individuals who have 'performed some signal act of valour or devotion to their country' will be fascinating reading for anyone who is interested in military history in general and in the long military tradition of the North of England.

This tribute to Professor J. A. (Tony) Mangan is well-deserved. Professor Mangan is a path-breaking scholar. Mangan's impact is measurable in the rarest of ways: institution-building. Under his leadership, a globally situated team has opened a new relationship between sport and the academy and I recommend *Manufacturing Masculinity: The Mangan Oeuvre -- Global Reflections on J.A. Mangan's Studies of Masculinity, Imperialism and Militarism* as, yet again, it offers a unique consideration of the relationship between sport and academy. Professor John D. Kelly - University of Chicago Professor Mangan has since the early 1980s been one of the foremost international scholars within his chosen field of cultural history. Over this period he has possibly more convincingly than any other international academic shown in his research how much sport and associated forms of competitive performance have not only reflected and reproduced but indeed sometimes also reformed and redirected fundamental political, cultural and social structures and ideological transformative forces in modern civilisation. Professor Henrik Meinander - University of Helsinki Professor Mangan is widely and greatly respected in China as a scholar of international distinction... he has made both direct and indirect contributions to Chinese scholarship especially regarding Chinese women and their long struggle for emancipation... Finally, and I cannot stress this point too strongly, a most important contribution ... has been his crystal clear and nuanced writing style much appreciated by... Chinese who wish to write for the international scholastic world. Professor Dong Jinxia - Peking University No one has had a more influential role in, or made a greater contribution to the cultural history of modern sport than Professor J.A. Mangan. With his visionary, pioneering monographs and many seminal edited collections and as founding editor of the series *Sport in the Global Society* with its numerous volumes and most especially as founding editor and editor of *The International Journal of the History of Sport* for some thirty years -- which he took from the original three numbers a year to eighteen numbers a year, his contribution has been unparalleled. Professor Roberta J. Park - University of California, Berkeley

Imagine Wayne Rooney, Andy Murray and Mo Farah exchanging the glamour of their careers for the brutality and bloodshed of war - and quietly giving their lives for their country. Today the news would be dominated by the sacrifice of Britain's most famous sporting icons. A century ago the brightest sporting stars of their generation did just that. Thousands of them rallied to their country's colours; many never returned from the mechanised carnage of the Great War, making the ultimate sacrifice in the hardest game of all. In this original and highly accessible book, Tim Tate reveals how sport itself was Britain's first and most vital recruiting sergeant in the fight against Germany and how sportsmen applied their unique talents on the battlefield, but also how a shared sporting spirit offered humane common ground amidst the horror of combat. Above all, *For Team and Country* tells the remarkable and inspiring stories of the sportsmen whose prowess on the field was matched only by their bravery in the King's uniform.

Ever since the first Olympiad held in Athens, the greatest ambition of the entire sports persons, world over, had been and still is to win an Olympic medal. In the early days, all sports competitions including Olympics, all athletes strived to uphold true sportsman spirit and instances of doping and similar corrupt practices were unheard of. With passage of time, the world of sports have undergone sea change especially with Corporate giants and super powers like USA/former USSR recognizing universal acceptability of sports and its potential as a tool for promoting their multi billion business across the world. This led to a mad race for world supremacy in sports. Though, this paved way for heavy investment in areas like creation of modern scientifically designed sports equipment, infrastructure and training modules, it had totally failed in taking forward many virtues of humanity like moral values and ethics. This environment gave birth to a new breed of sports persons and sports officials basking in the glory of sports devoid of any sportsman spirit.

From the former executive director of the Pro Football Hall of Fame comes a sweeping and lively history of the National Football League, timed to coincide with the NFL's 100th anniversary season. "I can think of no one better qualified—or more enthusiastic—to chronicle the National Football League's century-long history than Joe Horrigan."—Marv Levy, Hall of Fame NFL coach

The NFL has come a long way from its founding in Canton, Ohio, in 1920. In the hundred years since that fateful day, football has become America's most popular and lucrative professional sport. The former scrappy upstart league that struggled to stay afloat has survived a host of challenges—the Great Depression and World War II, controversies and scandals, battles over labor rights and competition from rival leagues—to produce American icons like Vince Lombardi, Joe Montana, and Tom Brady. It is an extraordinary and entertaining history that could be told only by Joe Horrigan, former executive director of the Pro Football Hall of Fame and perhaps the greatest living historian of the NFL, by drawing

upon decades of NFL archives. Compelling, eye-opening, and authoritative, NFL Century is a must-read for NFL fans and anyone who loves the game of football. Advance praise for NFL Century “Joe Horrigan takes the reader on a delightful tour of the seminal moments of the NFL in the past one hundred years—the players, owners, coaches, executives, and historical events that made the game of football the most popular in America. It’s a wonderful walk down memory lane for any football fan, young or old.”—Michael Lombardi, author of Gridiron Genius “There is no one—and I mean no one—who knows more about the history of the NFL than Joe Horrigan, the heart and soul of the Pro Football Hall of Fame. As the gold standard of sports leagues celebrates its one hundredth season, it’s appropriate that the gold standard of sports historians has written NFL Century, an entertaining and educational journey.”—Gary Myers, New York Times bestselling author of Brady vs Manning

The Great War has been largely ignored by historians of sport. However sport was an integral part of cultural conditioning into both physiological and psychological military efficiency in the decades leading up to it. It is time to acknowledge that the Great War also had an influence on sport in post-war European culture. Both are neglected topics. Sport, Militarism and the Great War deals with four significant aspects of the relationship between sport and war before, during and immediately after the 1914-1918 conflict. First, it explores the creation and consolidation of the cult of martial heroism and chivalric self-sacrifice in the pre-war era. Second, it examines the consequences of the mingling of soldiers from various nations on later sport. Third, it considers the role of the Great War in the transformation of the leisure of the masses. Finally, it examines the links between war, sport and male socialisation. The Great War contributed to a redefinition of European masculinity in the post-war period. The part sport played in this redefinition receives attention. Sport, Militarism and the Great War is in two parts: the Continental (Part I) and the "Anglo-Saxon" (Part II). No study has adopted this bilateral approach to date. Thus, in conception and execution, it is original. With its originality of content and the approaching centenary of the advent of the Great War in 2014, it is anticipated that the book will capture a wide audience. This book was originally published as a special issue of The International Journal of the History of Sport.

Football has never seemed so distant from its fans. Many have been alienated by the greed and shameless self-interest of the Premier League, and no one can predict how the global game will look post-pandemic. In Whose Game Is It Anyway?, Sunday Times best-selling author Michael Calvin searches for a reason to believe. Written at the height of the Covid-19 crisis, the book is a thought-provoking, deeply personal account of the role sport - and particularly football - plays in everyday life. Part memoir, part manifesto, it takes the reader on a tour of the world's greatest sporting occasions and into its outposts in sub-Saharan Africa, the Amazon Basin and the Southern Ocean. Drawn from Calvin's experience as an award-winning sportswriter, covering every major sports event

over 40 years in more than 80 countries, it offers first-hand insight into such icons as Muhammad Ali, Maradona and Sir Bobby Charlton. With settings ranging from a jungle clearing to a township in apartheid South Africa, this is sport as you've never seen it before.

This fascinating book examines the deadly impact of The Great War on a number of leading professional sportsmen of the age. Their untimely deaths pressed home how even the fittest and most gifted were vulnerable and their loss was felt by far more than their families and friends. Among those featured in this well illustrated book are: Donald Bell - the only professional football player to win the Victoria Cross; Anthony Wilder - the glamorous Wimbledon champion who fell in May 1915; Francois Faber - the Tour de France star; Percy Poulton Palmer - England Rugby Captain; and numerous others. Also covered are those sports-orientated units such as 16 Battalion Royal Scots (formed around Heart of Midlothian FC) and 11 King's Royal Rifle Corps (professional golfers). We learn of their formation, training and war service. Finally the authors study the effect of the conflict on the world of sport - canceling of fixture, use of facilities etc.

This book presents a series of fascinating case studies that show how the lives and bodies of clubs, players and fans around the world are enmeshed with politics. It draws on original research in countries including England, Scotland, Ireland, Poland, Mexico, Algeria and Argentina and includes both historical and contemporary perspectives. It explores some of the most important themes in the study of sport, including sectarianism, migration, fan activism and national identity, and shows how football continues to be tied to political events, symbols and movements. This is fascinating reading for any student or researcher working in sport studies, political science, sociology or contemporary history. This book provides a broad range of international case-studies to examine how sport has helped to shape national identities, and how national cultures have shaped contemporary sport.

Mark Dyreson locates the invasion of sport at the heart of American culture at the turn of the century. It was then that social reformers and political leaders believed that sport could revitalize the "republican experiment," that a new sense of national identity could forge a new sense of community and a healthy political order as it would serve to link America's thinking classes with the experiences of the masses. Nowhere was this better exemplified than in American accounts of the Olympic Games held between 1896 and 1912. In connecting sport to American history and culture, Dyreson has stepped up to the plate and hit one out of the park.

Set against the backdrop of depression-era politics, 1934 was an *annus mirabilis* for English sport. Within just a few days of each other, Hedley Verity, Henry Cotton and Fred Perry all triumphed in their field. To a sporting audience still groaning through the quagmire left by the Great Depression, greedy for inspiring distractions, these heroic events made for a heady spectacle. England's Ashes Test victory at Lord's (later known as Verity's match) saw Australia seeking revenge after the Bodyline series of 1932-33, but Verity bowled England to a famous innings victory, taking 15 wickets - 14 in one day! That same day, Cotton set out on the first

qualifying round of the British Open. He went on to set a new Open record with a game so sparkling the Daily Express called it "the best round of golf ever played". And within a fortnight, Perry had beaten Australia's Jack Crawford in the Wimbledon final. England had an extraordinary national hatrick. Together, these three contests and these three singular life stories weave a vivid portrait of an England that has faded from view. Half-Time celebrates a time of intense and rapid social and cultural change, a time that was both the last hurrah of the ancien regime and the stirring of something new. And moving through it, famous actors on a grand stage, are three very English heroes.

The second edition of this innovative textbook introduces students to the ways that society shapes our many forms of entertainment and in turn, how entertainment shapes society. Entertainment and Society examines a broad range of types of entertainment that we enjoy in our daily lives – covering new areas like sports, video games, gambling, theme parks, travel, and shopping, as well as traditional entertainment media such as film, television, and print. A primary emphasis is placed on the impact of technological and cultural convergence on innovation and the influence of contemporary entertainment. The authors begin with a general overview of the study of entertainment, introducing readers to various ways of understanding leisure and play, and then go on to trace a brief history of the development of entertainment from its live forms through mediated technology. Subsequent chapters review a broad range of theories and research and provide focused discussions of the relationship between entertainment and key societal factors including economics and commerce, culture, law, politics, ethics, advocacy and technology. The authors conclude by highlighting innovations and emerging trends in live and mediated entertainment and exploring their implications for the future. The new edition features updated examples and pedagogical features throughout including text boxes, case studies, student activities, questions for discussion, and suggestions for further reading.

Sport has become an important avenue in how we interpret, remember, and maintain our heritage. Whether it is being applied in tourism marketing and development, employed as a vehicle for social cohesion, or utilized as a way of articulating personal and collective identities, sport heritage is a vital topic in understanding what we value about the sporting past now what we wish to pass on to future generations. This edited collection brings together many new and exciting international approaches to sport heritage. Each of the chapters in this collection provides a thought-provoking sport heritage case study that would be of interest to students and researchers in history, geography, anthropology, and marketing, as well as industry practitioners working at sporting events, at sports-based heritage attractions such as museums and halls of fame, and at sports stadia and sports facilities. In addition, this collection would also be of interest to those readers with a more general interest in sport heritage and the sporting past. This book was published as a special issue of the Journal of Heritage Tourism. The Germans fighting on two fronts were concentrating in the east where the Russians were weakening. In the west, the Allied effort was met with well prepared German defences, and efforts to open a new front on the Gallipoli Peninsula had foundered. Decisive action to break the deadlock on the Western Front saw a mighty attack of six British divisions planned for the autumn of 1915 in the vicinity of the small mining community of Loos en Gohelle where 'The Big Push' would begin. The bitter recriminations that followed the perceived failure reduced the Battle of Loos to a footnote in the history of the Great War for many decades. Entirely lost in translation has been the Boys' Own tale of the Tommy who kicked a football ahead of the charge. That soldier was identified as Rifleman Frank Edwards, and through his original research, Ed Harris clearly establishes for the first time that the first great attack by the British army was begun when Edwards kicked a football towards the German lines. Harris sheds light on what it was like to be a part of this crucial battle and questions the largely held view that Loos was a failure, using material sourced from a wide variety of sources from the Imperial
