limited to the two brothers who run the neighbourhood hole-in-the-wall from which she orders dinner every evening. Then, disaster! Visa issues. The brothers close up shop, and fast. But they have one last delivery for Lois: their culture, the sourdough starter used to bake their bread. She must keep it alive, they tell her - feed it daily, play it music, and learn to bake with it. Lois is no baker, but she could use a roommate, even if it is a needy colony of microorganisms. Soon, not only is she eating her own homemade bread, she's providing loaves daily to the General Dexterity cafeteria. The company chef urges her to take her product to the farmer's market, and a whole new world opens up. When Lois comes before the jury that decides who sells what at Bay Area markets, she encounters a close-knit club with no appetite for new members. But then, an alternative emerges: a secret market that aims to fuse food and technology. But who are these people, exactly? Sourdough is a soup of skilfully balanced ingredients: there's satire, a touch of fantasy, a pinch of SF, all bound up with a likeable narrator whose zest for life is infectious. The novel opens a door on a world that's both comforting and thrillingly odd. - The Guardian

craft of covering up missed cues, the drama of the First Night, the nightmare of touring, or the secret ingredients of star quality. Edmund Kean, Henry Irving, John Gielgud, Laurence Olivier, Ellen Terry, Edith Evans, Maggie Smith, Helen Mirren—the great 'names' are all here, of course, but there are tales of the unexpected, too—and the unknown. This is a book—presented in five acts, with a suitably anecdotal and personal prologue from Gyles Brandreth—where, once in a while, the understudy takes centre-stage and Gyles Brandreth treats triumph and disaster just the same, including stories from the tattiest touring companies as well as from Broadway, the West End and theatres, large and small, in Australia, India, and across Europe.

"Dividing the spoils" revives the memory of Alexander's Successors, whose fame has been dimmed only because they stand in his enormous shadow. In fact, Alexander left things in a mess at the time of his death, with no guaranteed succession, no administration in place suitable for such an enormous realm, and huge untamed areas both bordering and within his 'empire'. The Successors consolidated the Conqueror's gains. Their competing ambitions, however, meant that consolidation inevitably led to the break-up of the empire.

Did mankind evolve unusually large brains simply in order to gossip? Primates differ from other animals by the intensity of their social relationships, by the amount of time they spend grooming one another. Not just a matter of hygiene, grooming is all about cementing bonds, making friends and influencing your fellow ape. Early humans, in their characteristic large groups of 150 or so, would have had to spend almost half their time in mutual grooming. Instead, Professor Robin Dunbar argues, they evolved a more efficient mechanism: language. It seems there is nothing idle about idle chatter. Having a good gossip ensures that a dynamic group - of hunter-gatherers, soldiers, workmates - remains cohesive. Men and women 'gossip' equally, but men tend to

talk about themselves, while women talk more about other people, working to strengthen the female-female relationships that underpin both human and primate societies. Until now, most anthropologists have assumed that language developed in male-male relationships, during activities such as hunting. Dunbar's intriguing research suggests that, to the contrary, language evolved among women.
