With expert science and compelling storytelling, Gary Taubes investigates the history of nutritional science which, shaped by a handful of charismatic and misguided individuals, has for a hundred years denied the impact of sugar on our health. He exposes the powerful influence of the food industry which has lobbied for sugar's ubiquity - the Sugar Association even today promoting 'sugar's goodness' - and the extent that the industry has corrupted essential scientific research. He delves into the science of sugar, exposes conventional thinking that sugar is 'empty calories' as a myth, and finds that its addictive pleasures are resulting in worldwide consumption as never experienced before, to devastating effect. *The Case Against Sugar* is a revelatory read, which will fundamentally change the way we eat.

French people use the term fat diabetes (diabete gras) to refer to type 2 diabetes: the milder, reversible form of diabetes mellitus that occurs in overweight people. In this fascinating book, Laurie Endicott Thomas provides clear and often surprising explanations of why people get diabetes, and what they can do about it. Diabetes does not result from eating too much sugar and starch. Type 2 diabetes results from eating too much fat,

and type 1 diabetes results from a problem in the immune system. Type 2 diabetes is not really a disease. It is a defense mechanism. If you have type 2 diabetes, you are a naturally thin person, and your body is willing to sacrifice everything to keep you from gaining even more weight from a diet that is too rich in fat. The solution to this problem is to a low-fat vegan (purely plant-based) diet. Such a diet reverses type 2 diabetes and helps to improve the health of people with type 1 diabetes. Dr Mike Moreno's 17 Day Diet is a revolutionary new weight-loss programme that activates your skinny gene so that you burn fat day in and day out. The diet is structured around four 17-day cycles: Accelerate- the rapid weight loss portion that helps flush sugar and fat storage from your system; Activate-the metabolic restart portion with alternating low and high calorie days to help shed body fat; Achieve - this phase is about learning to control portions and introducing new fitness routines; Arrive - A combination of the first three cycles to keep good habits up for good. Each cycle changes your calorie count and the food that you're eating. The variation that Dr. Mike calls 'body confusion' is designed to keep your metabolism guessing. This is not a diet that relies on a tiny list of approved foods, gruelling exercise routines, or unrealistic calorie counts that leave you hungry and unfulfilled. Each phase comes with extensive

lists of what dieters can and can't eat while on the phase, but also offers acceptable cheats. He advises readers not to drink while on the diet, but concedes that if they absolutely have to then they should at least drink red wine. Dr Mike knows that a diet can only work if it's compatible with the real world, and so he's designed the programme with usability as a top priority.

Current medical wisdom advises that anyone suffering from diabetes or prediabetes should eat a low-carbohydrate, high-fat diet. But in this revolutionary book, Cyrus Khambatta, PhD, and Robby Barbaro, MPH, rely on a century of research to show that advice is misguided. The revolutionary solution is to eat a low-fat plant-based whole-food diet, the most powerful way to reverse insulin resistance in all types of diabetes: type 1, type 1.5, type 2, prediabetes, and gestational diabetes. As the creators of the extraordinary and effective Mastering Diabetes Method, Khambatta and Barbaro lay out a step-by-step plan proven to reverse insulin resistance-the root cause of blood glucose variability- while improving overall health and maximizing life expectancy. Armed with more than 800 scientific references and drawing on more than 36 years of personal experience living with type 1 diabetes themselves, the authors show how to eat large quantities of carbohydrate-rich whole foods like bananas, potatoes, and quinoa while decreasing blood glucose, oral medication, and insulin requirements. Studies show that fasting—whether through moderate calorie restriction every day or the more severe but less frequent intermittent fasting—can help people lose about thirteen to fourteen pounds in six months and reduce their risk of developing disease. When we fast, our body's energy stores activate what is known as sirtuins, or the "skinny gene," and many positive changes ensue. Fat storage is switched off, and our body stops its normal growth processes and goes into "survival" mode. Fat burning is stimulated and the genes involved in the repair and rejuvenation of our cells are turned on—which all results to weight loss and improved resistance to disease. But if not done correctly, fasting can lead to hunger, irritability, fatigue, and loss of muscle. Enter Sirtfoods: a newly discovered group of foods that is revolutionizing healthy eating. Ranging from chocolate and red wine to garlic and walnuts, sirtfoods are particularly rich in special nutrients that help us activate the same skinny genes in our bodies that fasting triggers. Nutritionists Aidan Goggins and Glen Matten have created The Sirtfood Diet to help you effectively lose weight and improve your resistance to disease, while still giving you incredible energy and glowing health.
