In recent years there has been a growing interest in the study of hospitality as a social phenomenon. This interest has tended to arrive from two communities. The first comprises hospitality academics interested in exploring the wider meanings of hospitality as a way of better understanding guest and host relations and its implications for commercial settings. The second comprises social scientists using hosts and guests as a metaphor for understanding the relationship between host communities and guests as people from outside the community – migrants, asylum seekers and illegal immigrants. The Routledge Handbook of Hospitality Studies encourages both the study of hospitality as a human phenomenon and the study for hospitality as an industrial activity embracing the service of food, drink and accommodation. Developed from specifically commissioned original contributions from recognised authors in the field, it is the most up-to-date and definitive resource on the subject. The volume is divided into four parts: the first looks at ways of seeing hospitality from an array of social science disciplines; the second highlights the experiences of hospitality from different guest perspectives; the third explores the need to be hospitable through various time periods and social structures, and across the globe; while the final section deals with the notions of sustainability and hospitality. This handbook is interdisciplinary in coverage and is also international in scope through authorship and content. The 'state-of-the-art' orientation of the book is achieved through a critical view of current debates and controversies in the field as well as future research issues and trends. It is designed to be a benchmark for any future assessment of the field and its development. This handbook offers the reader a comprehensive synthesis of this discipline, conveying the latest thinking, issues and research. It will be an invaluable resource for all those with an interest in hospitality, encouraging dialogue across disciplinary boundaries and areas of study.

As research in tourism and hospitality reaches maturity, a growing number of methodological approaches are being utilized and, in addition, this knowledge is dispersed across a wide range of journals. Consequently there is a broad and multidisciplinary community of tourism and hospitality researchers whom, at present, need to look widely for support on methods. In this volume, researchers fulfil a pressing need by clearly presenting methodological issues within tourism and hospitality research alongside particular methods and share their experiences of what works, what does not work and where challenges and innovations lie.

The first book to bring together environmental theory and the responsible hospitality debate to define how far the industry has gone and what is left to achieve.

The Theory of Hospitality and Catering

This study investigates the thinking of European authors from Vitoria to Kant about political justice, the global community, and the rights of strangers as one special form of interaction among individuals of divergent societies, political communities, and cultures. Taking an interdisciplinary approach, it covers historical material from a predominantly philosophical perspective, interpreting authors who have tackled problems related to the rights of strangers under the heading of international hospitality. Their analyses of the *civitas maxima* or the *societas humani generis* covered the nature of the global commonwealth. Their doctrines of natural law (*ius naturae*) were supposed to provide what we nowadays call theories of political justice. The focus of the work is on international hospitality as part of the law of nations, on its scope and justification. It follows the political ideas of Francisco de Vitoria and the Second Scholastic in the 16th century, of Alberico Gentili, Hugo Grotius, Samuel Pufendorf, Christian Wolff, Emer de Vattel, Johann Jacob Moser, and Immanuel Kant. It draws attention to the international dimension of political thought in Thomas Hobbes, John Locke, Jean-Jacques Rousseau, David Hume, Adam Smith, and others. This is predominantly a study in intellectual history which contextualizes ideas, but also emphasizes their systematic relevance.

Customer service is of critical importance for the tourism and hospitality sector now more than ever before as customers are looking to increase value for money and are less forgiving of mediocre service. In essence it is the 'whys' and 'hows' of customer service. It is easy to read, very current, and full of references to all the latest research from both academic and practitioner literature. Chapters cover important topics such as the financial and behavioural consequences of customer service, consumer trends influencing service, developing and maintaining a service culture, managing service encounters, the importance of market research, building and maintaining customer relationships, providing customer service through the servicescape, the impact of technology on customer service, the importance of service recovery, and promoting customer service internally and externally. Key features include: An 'At Your

Service' Spotlight at the beginning of each chapter focuses on the achievements of successful individuals related to the art of customer service. Each chapter contains a 'Service Snapshot' - short, real-life cases to illustrate a particular concept or theoretical principle presented in the chapter. Detailed international 'Case Studies', which cover a variety of sectors, organizations and regions designed to foster critical thinking, the cases illustrate actual business scenarios that stress several concepts found in the chapter. They analyze customer service in the U.S., South America, South Africa, Europe, Russia, Australia, China, Canada, Korea and Dubai.

Key factors in this relationship between tourism and the airline sector are marketing and economics, both of which are fundamental to the success of tourism in general and airlines in particular, not least given the increasing significance of low-cost airline operations. Hence, uniquely drawing together these three themes, this book provides a valuable introduction to the marketing and economics of tourism with a specific focus on airline operations, and should be considered essential reading for future managers in the tourism sector." The source of hospitality lies in the fundamental ethical experiences that make up the fabric of the social lives of people. Therein lies a primary form of humanity. Whether we are guests or hosts, this reveals our situation in a world made up of receiving and meeting, leaving room for the liberty to give and receive beyond the imperatives of reciprocity. This book proposes an ethic that promotes the possibility of

stirring emotion before that of protecting ourselves from unexpected encounters. Fundamental ethical competence consists of opening up to the wholly other and to others, to be accessible to the world's solicitations. There is moral superiority of vulnerable love over control and moderation, of generous passion over rational prudence and of excess over exchange. Constructing an ethic of hospitality is essential at a time when we are torn between the imperatives of modernization and growth and the demands of concern and protection. The experience we all have today, that of the fragility of the world, is giving rise to a powerful tendency toward solicitude. From such a perspective, the duty of individuals no longer consists of protecting themselves from society, but of defending it, taking care of a social fabric outside of which no identity can be formed.
