As an asset class, commodities are now as important as stocks and bonds – and with rapid growth in demand, profit opportunities in commodities are larger than ever. But today's computer-driven markets are volatile and chaotic. Fortunately, you can profit consistently – and this tutorial will show you how. Building on more than 30 years of market success, George Kleinman introduces powerful trend-based techniques for consistently trading in your “sweet spot” for profits. Kleinman reveals exactly how the commodities markets have changed – and how you can use consistent discipline to avoid “shark-infested waters” and manage the market's most dangerous risks. Ideal for every beginning-to-intermediate level trader, speculator, and investor, this guide begins with the absolute basics, and takes you all the way to highly-sophisticated strategies. You'll discover how futures and options trading work today, how trading psychology impacts commodity markets even in an age of high-frequency computer trading, and how to avoid the latest pitfalls. Kleinman offers extensively updated coverage of electronic trading, today's contracts, and advanced trading techniques – including his exclusive, powerful Pivot Indicator approach. Three previous editions of this tutorial have become international best-sellers. But the game has changed. Win it the way it's played right now, with *Trading Commodities and Financial Futures, Fourth Edition* .

Do you want to know more about futures trading? Have you been unsuccessfully trying to learn future trading? All you need to do is to keep reading. Today, most traders prefer to trade in futures due to its associated advantages. Trading in futures is quite flexible and diverse. The good news is that a trader can employ almost any methodology to trade. Some traders shy away from this form of trading due to their limited knowledge about futures. Also, others are discouraged from trading in futures because they think that it is difficult. Well, to some extent, this is true. Comparing trading in futures to trading in stocks, the former is very risky. Futures markets have patterns, much the same as different protections markets do. Items tend not to have a similar unpredictability as stocks, however can likewise be less unsurprising. At the point when you distinguish a pattern through thorough research and testing, it speaks to your most obvious opportunity to benefit. Research includes investigating which components sway the organic market of the item that you're keen on. Testing includes making mimicked interests in prospects that you think you see slants in, to see whether a genuine venture would have worked out. As a futures trader, you should make sure that you understand very clearly what a short position is and a long position is. There are plenty of novice traders who believe that you only make money or are profitable when markets are on an upward trend. However, you need to understand that futures' trading constitutes a lot more than just following the upward market trend. You also should know by now that as a futures trader you can benefit greatly when you focus on asset types that have attained a climax and are close to failure. As a trader, anytime that you wage your money against an asset, then you will be said to be selling it short. Selling an asset short simply means that you will engage your broker and purchase the rights to access the asset with the hopes of selling it back later once it becomes profitable. Always follow the trends because if you are attracted to futures trading then you are less naturally inclined to follow trends in the market, preferring instead to jump in on opportunities when they are still forming. This is a habit that you are going to

need to break if you plan on trading in futures, however, as typically you will find that the practice is much more profitable if you stick with the trends of the major players and deviate from them as little as possible. The goal of this book is simple: To make you understand well trading in futures and how you can easily earn and become a pro in future trading. Other things You will also learn in the book include: Futures and Micro Futures Day Trading: Future, Micro Futures Vs Stock Futures and Micro Futures Contracts Choosing a Broker The Types of Trade Orders to Use for Index Trading Trade Psychology and Account Management Technical Charting Patterns and Indicators Practice to Gain Confidence Prior Checklist and Trading Log Mistakes to Avoid Develop a Trading Plan ?Are you interested in knowing more? I have seen brand new futures investors and traders around the world waste a serious amount of valuable education and training time on learning information that will not do them any good and can even cause them to lose some of their hard earned money right away in the live markets. No one wants that however it is a huge mistake that virtually all brand new futures traders make because they don't know any better, after reading this book you will. I don't care where you trade from or what you trade, Dubai to Detroit or Mumbai to Manhattan doesn't matter because a chart is a chart and supply and demand is supply and demand, period, live markets don't work any other way no matter where in the world you are or what your trading even camels or goats. New futures traders all around the world spend waaaay too much time on looking for the magical combination of indicators, settings and colors they think will show them something that is going to help them make more money. There are no shortcuts or bells that go ding to tell you to enter the right position so stop looking right now and if you are using something like that and you're losing money that is why. All you need to see is right in front of you on the price chart and that is price and time. Those are the only things that professional futures traders care about and nothing else. You can certainly use your chart like a crystal ball to tell you where price will go with a high degree of certainty. When you are done reading this book you will have an excellent basic explanation of what and what not to do before you even study anything or do any kind of education. The information in this book will put you on the fast track to becoming a successful self-directed futures investor and trader no matter where you trade from in the world or what you trade with very little money invested. This book gives you the brutal and harsh truth of what happens in real life, in real time and in real money in the worlds live markets every day. There are no short cuts and you must do the time if you want to drive your own money train to the bank.

It is huge step when you make the decision to become a self-directed trader. Most brand new traders are getting into this business because they think they can make quick money and become rich beyond their dreams. While that may be

true, it is not as easy as one thinks and certainly will not happen as soon as one thinks. There are only two groups of people who are doing business in the markets, the professionals and the retail investors and traders Brand new self-directed traders all make the same mistakes over and over because they don't know any better, now you do. New futures traders tend to do what everyone else is doing and study what everyone else is studying thus they have the same results and failures as everyone else. Don't be that trader! If you can just take the time to read this information in High Profit Futures Trading for complete Beginners, let it sink in and then continue on your educational journey you will have done yourself a huge favor and also begun to give yourself the needed edge to succeed in this business. I have tried to give you in High Profit Futures Trading for complete Beginners the truth of what happens in real life, in real time and in real money in the live markets every day. There are no short cuts and you must do the time if you want to drive your own money train. I try to keep the explanations clear concise, simple and uncomplicated. High Profit Futures Trading for complete Beginners gives you substantial value and is going to be the foundation of your pre education for trading. When you are done reading High Profit Futures Trading for complete Beginners you will have an excellent basic explanation of what and what not to do before you even study anything or do any kind of education. The information in High Profit Futures Trading for complete Beginners will put you on the fast track to becoming a successful self-directed investor and trader with very little money invested other than the cost of High Profit Futures Trading for complete Beginners, learning it Harvard or Columbia business school would cost one hundred thousand dollars or more.

What you need to know in order to successfully day trade commodities. Day trading has drawn droves of new speculators into highly leveraged commodity markets. Many traders find futures preferable to options because they are sure to always move along with the asset that they are related to. Even better, unlike some other markets, no artificial

restrictions are limiting your ability to short trade, making your job as a day trader much more comfortable in the process. The futures market can be analyzed directly, which means that you can profit from anticipation on the market without having to take any derivative pricing into account. If you are attracted to futures trading, then you are less naturally inclined to follow trends in the market, preferring instead to jump in on opportunities when they are still forming. This is a habit that you are going to need to break if you plan on trading in futures, however, as typically you will find that the practice is much more profitable if you stick with the trends of the major players and deviate from them as little as possible. This book covers the following topics: How to Start Trading How to Read the Main Tools and Charts Futures Trading Strategies Which Market to Trade-In and Which Broker to Use Different Types of Securities Economic Factors Influencing Investment Prospects Trading Strategies for Beginners Profit on the Futures Market Common Trading Mistakes to Avoid And Much More! If you manage to find a trend while day trading, then there is a high chance that you will be able to successfully make a profit off of it, assuming it sticks around long enough to let you. When it comes to confirming the direction of a potential trend, you will want to take note of professionals who are trading in the space before confirming that the trend is set to continue moving forward as well. As a brand new futures investor and trader with zero knowledge of the business you are at a loss as to what information you actually do and do not need. Much of what the current trading education industry is putting out is not only giving you information that is all backwards, it is very unrealistic to do in the live markets, and can get you into a lot of trouble. Why would you want to learn something that could potentially cause you to lose money right away in your new trading business? The trading education industry is not regulated so beware of that. I have seen brand new futures investors and traders waste a serious amount of valuable education and training time on learning information that will not do them any good and can even cause them to lose some of their hard earned money right away in the live markets. No one wants that however it is a huge mistake that brand new futures traders make because they don't know any better. Futures Trading for Self-Directed Beginners is unique because it is going to tell you about who your competition is and how you can beat them, what you need to study first that will make you rich fast, where you need to go to get consistently profitable quickly, when you should and should not be in the live market and how about the other information you need

to know to be able to trade and invest in today's financial markets (or any tradable market) with confidence and zero fear and to be able to do it on as little as \$500 capital to start with. Futures Trading for Self-Directed Beginners will help you understand how important it is to have a competitive edge when putting your hard earned money at risk in the markets. Each day, the wealth from beginner trader's accounts is transferred from those without an edge into the accounts of those who have developed a rule based plan that gives them the needed edge to destroy the competition which one do you want to be? Do you want to be the one who is always paying or do you want to be the one who gets paid?
